ZERO WASTE PRACTICES

What does it mean to go "zero waste?" Going zero waste is an aspirational attempt to lower our individual waste footprints, or to throw away as little as possible. It goes back to a few primary tenants: reduce, reuse, recycle, compost, and source local.

Reduce: The most direct way to reduce your waste, and sometimes the most overlooked. Reduction is all about using less in the first place. In a culture centered around consuming, to use less stuff is a radical act. This principle should always be accounted for. Do I really need this?

Reuse: Reuse is a critical part of reducing our waste. Think about your daily habits, and choose one or two to start with. Use a reusable bottle, bring your own container for take-out, carry a reusable cup for coffee shop visits, learn basic mending or repair skills... there are so many options to incorporate reuse into your daily life.

Recycle: The EPA estimates that 75% of waste in the United States can be recycled. Learning the regulations for your curbside recycling bin and finding recycling centers for hard-to-recycle items can help reduce the amount of waste that ends up in our landfills.

Compost: Organic materials such as fruit and veggie scraps, dirt, wood, and lawn waste can be recycled into nutrient-rich and healthy soil. Composting not only keeps organic waste out of landfills, but also helps naturally boost the quality of soil in our gardens and lawns.

Source Local: Shop local! Not only is sourcing products locally a great way to support your community, but it also cuts down on your personal footprint by reducing transportation emissions and conserving other important resources.

HARD TO RECYCLE ITEMS

Not everything can be recycled in your standard curbside bin. There are several resources available for hard to recycle items, including batteries, paint, household chemicals, and more!

Oklahoma City Recycling Requirements:

Be sure to check for your local municipality for specific recycling requirements, locations, and limitations.

Recyclable Items:

Paper
Metal Cans
Plastic
Cardboard
Glass Bottles/Jars
Paper Cartons

Recycling Requirements:

Items must be empty, clean and dry.

Items must be placed loose in the recycling bin - not bagged.

[Hard to Recycle Item Drop Off](#)

Click here to access the City of Oklahoma City's "Beyond the Bin" list, which provides resources for recycling less common items.

[OKC Recycling Drop Off Locations](#)

Here you will find locations for recycling centers in Oklahoma City.

[OKC Hazardous Waste Dropoff](#)

The OKC Household Hazardous Waste Collection Center allows you to shop previously discarded household chemicals for free.

For more information about Oklahoma City's commercial recycling options and resources, check out OKC Beautiful's [Green Business Guide](#).

SUSTAINABLE CLOTHING

With the rise of fast fashion and the ever-evolving nature of style, clothes cycle in and out of people's wardrobes regularly. Because of this, textiles are a massive contributor to the amount of total U.S. waste. Add sustainable shopping and textile recycling to your routine to keep your clothes out of the landfills.

[Library OKC](#)

LibraryOKC is a clothing borrowing service where you share clothing with others in the community.

www.library.clothing | **2807 N Walker Ave Suite 5** | [@libraryokc](#)

Clothing Swaps

Clothing swaps are an opportunity to update your wardrobe in a sustainable and eco-friendly way.

After purchasing a ticket and bringing a bag of your own clothes, you can shop around other participant's closets. [@okcclothingswap](#) | [OKC Children's Clothing Swap](#)

[Thrift & Vintage Stores](#)

Supporting secondhand stores is a great way keep gently used and pre-owned textiles out of landfills.

Follow the link to find a map of Oklahoma City's thrift stores.

Several retail stores offer on-site textile recycling.
Some stores in Oklahoma City include:

COMPOSTING RESOURCES

Organic waste is something we encounter in our daily lives and a huge component of waste we produce. You can reduce your food waste footprint by recycling food waste in a home compost, or through utilization of these local composting services.

[Fertile Ground Cooperative](#)

If you don't have the resources to build up home compost, Fertile Ground's curbside program is a potential option.

Fertile Ground collects household food waste and yard or landscaping waste (on a limited basis) for community compost that is distributed out annually to program participants and donated to local schools and gardens.

www.fertilegroundok.coop | 405-633-0264 | [@fertilegroundok](#)

[Prairie Dirt Solutions](#)

Tree debris from storms, construction projects, and natural disasters end up in landfills every day. Prairie Dirt Solutions

picks up large-scale wood and dirt waste and creates compost with it.

www.prairedirtsolutions.com | 405.365-5023 | [@prairedirtsolutions](#)

[Chip Drop](#)

Looking for wood chips for your garden or compost? Need a sustainable use for leftover wood from a project?

Chip Drop delivers arborist wood chips to people for their yard, garden, and compost projects for free. www.getchipdrop.com | [@chipdrop](#)

[Green Waste Facilities in Norman & Midwest City](#)

Norman and Midwest City residents have access to yard waste drop-off at municipal facilities.

Norman - 398 Bratcher Miner Road - [Click here for details.](#)

Midwest City - 7420 NE 36th St - [Click here for details.](#)

MENDING & REPAIR

The normal wear and tear of everyday items can be reduced with proper care. When your items start showing signs of damage, consider taking them in for a fix before you toss them! Not only can this save you money, but it also reduces the amount of fixable and usable items that end up in landfills.

[Appliance Repair](#)

Click here to find repair options for kitchen, outdoor, and personal appliances.

[Automotive Repair](#)

Click here to find maintenance and repair for motor vehicles.

[Bicycle Repair](#)

Click here to find maintenance and repair for cycling needs.

[Camera Repair](#)

Click here to find maintenance and repair for photography equipment.

[Electronics Repair](#)

Click here to find repair options for electronic software and hardware.

[Shoe Repair](#)

Click here to find cobbler services.

[Tailors and Clothing Repair](#)

Click here to find tailoring and mending for clothing and other textiles.

Zero-Waste Pro Tip:

Following the care instructions of the products you buy can extend their lifespan by a lot! Review your tags and manuals to ensure proper use and maintenance.
